

Welcome to the Archimedes Reference Architecture Portal

Explore comprehensive reference architectures, practical implementations, and interactive demos designed to accelerate your automated **Archimedes** Solution development.

Data Stream

Discover how data streaming powers to fetch all the information related to your testers.

UltraEdge

Explore architectures related to the UltraEdge. This will guide you on the way to communicate with an UltraEdge

Test Program Interactions

Adaptive tests, Rebin, gives you the opportunity to connect to your test program with or without UltraEdge.

Use Cases

Browse practical implementations and scenarios showing how Archimedes accelerates how to unleash the power of Archimedes.

Supplementary

Additional topics, tips, and resources to enhance your Archimedes experience.

Artificial Intelligence

Explore AI-powered features and machine learning integrations for intelligent test automation.

Demos

Interactive Demonstrations

Explore our comprehensive collection of interactive demos showcasing Archimedes product capabilities. These hands-on demonstrations provide practical insights into innovative solutions and real-world implementation scenarios.

Available Demonstrations

Experience step-by-step showcases that illustrate how you can easily address complex challenges and leverage the full capabilities of our solutions. Contact your sales representative to schedule a personalized demonstration.

Adaptive Test Demos

[Adaptive Commands](#)

ID: RA_FAARCH_453

Demonstrates the different capabilities of the Adaptive Commands with IG-XL, showcasing dynamic test configuration and real-time adaptation features.

IG-XL Adaptive Commands Real-time

[Adaptive Commands and UE](#)

ID: RA_FAARCH_451

Demonstrates how Adaptive test can be implemented with an UltraEdge, combining edge computing power with intelligent test adaptation.

UltraEdge Adaptive Test Edge Computing

Demo Categories

Test Innovation

Discover new ways to innovate and optimize your testing processes

Problem Solving

Learn how to easily address complex testing challenges

Capabilities Showcase

Experience the full range of our platform capabilities

Performance Optimization

See how our solutions can improve your testing efficiency

Getting Started with Demos

Ready to explore? These demonstrations are designed to showcase innovative approaches to automated test equipment challenges. Each demo provides detailed explanations of implementation strategies and practical applications.

For personalized demonstrations or to discuss specific use cases, please contact your sales representative to arrange a tailored session.
